 - BlackBerry:** 7100i, 7520
- Data Service Plan

TeleNav GPS Navigator

GPS Navigation

TeleNav announces directions as you need them and tells you the direction you are traveling. The directions are announced through your speaker-phone or earpiece.

While driving TeleNav displays your current street, your next turn street, the distance to your turn and the type of turn. TeleNav knows when you miss a turn. And automatically re-routes you.

Business Finder

Find businesses by type. Find the nearest restaurant, hotel or the least expensive gasoline anywhere in the U.S. TeleNav updates the content automatically and for FREE.

Gasoline Prices

TeleNav helps you to find the nearest and least expensive gasoline, no matter where you are. The prices are updated daily and are current.

GPS Tools

TeleNav provides you with GPS tools such as a compass and waypoint marker. Mark points of interest to remember important areas.
